CLAIMS

HANDLING

Diadilos Solutions provides local expertise throughout the Greek region for the rapidly growing aquaculture industry in Southeast Europe.

Aquaculture experts and technical staff are available to handle all specialized claims concerning the commercial aquaculture farming since it is seen as the only alternative to meet the growing demand for fish products and quality seafood around the globe.

Diadilos Solutions's professionals and expert colleagues fully understand the dynamics behind such claims. Our expertise allows us to deal with the detailed investigations and loss-quantifying measures required to properly document highly complex aquaculture claims in growing farms and relevant hatchery operations. We understand and address the unique & special issues that arise from mortality or loss of stock often resulting from:

- Non-compliance of appropriate procedures
- Pollution
- Contamination
- Transit (shore to site, sea site to sea site)
- Algae
- Weather losses
- Mass escape
- Diseases
- Theft
- Predators
- Super chill
- Facilities
- Vessel collision

“Experienced and highly qualified claims services.”

In addition to the above, our company also undertakes the necessary and frequent inspections & surveys of all the components of a fish farm, such as:

- Floating installations
- Nets
- Cages
- On shore building installations
- Off shore installations
- Mooring systems
- Financial Audit of the company
- Condition of Vessels
- Equipment, i.e. crane
- Policies & Procedures, i.e. Safety, Risk Management & Contingency systems, feeding, water supply, records & logs, human resources management
- Food quality
- Risk Assessment, i.e. appropriate location, potential contamination sources

As part of our continuing efforts to provide our customers with every possible, detailed and documented study - view - opinion on this particular field, we work with the:

National Association of Technologists Ichthyologists of Greece.
